GEAR UP TYPOLOGY SURVEY

TYPOLOGY DEFINED

For this study, typology refers to the classification of GEAR UP grant projects based on common characteristics—**it is creating groups, or archetypes, of grant projects based on common characteristics by examining different areas of grant implementation.**

SURVEY PURPOSE

The GEAR UP Typology survey was developed **by** the GEAR UP community, **for** the GEAR UP community. The survey results will expand our knowledge of GEAR UP by identifying archetypes of grants across five domains: **organization, design, implementation, resources and capacity, and evaluation**.

SURVEY IMPACT

Survey results will increase knowledge of common models for GEAR UP which leads to: **understanding the scope of GEAR UP models, more targeted pre- and post-award training, advanced professional development, improved programming, facilitation of small networking communities, strengthened evaluation capacity, and more effective advocacy.**

SURVEY PARTICIPANTS

The results of the GEAR UP Typology survey will be most impactful if **all** GEAR UP grantees respond to the survey. **Project Directors** will complete one survey for **each** awarded grant project.

HOW TO PARTICIPATE

The GEAR UP Typology Survey window is now closed. NCCEP will communicate with Project Directors regarding future survey administration opportunities.
